## South Hill, Va.

SURROUNDED BY MILES OF RICH FARMING LANDS in the progressive county of Mecklenburg.

THIRTY PROSPEROUS MERCHANTS and the biggest box factory and lumber mills in the county.

If you want to locate in a good town in which to live and conduct a paying business, then get in touch with South Hill, Va.

Is just seven years old, and has many inducements to offer those who have money, brains and muscle to invest.

To know the special things to be found here, address

SOUTH HILL BOARD OF TRADE.

R. E. DANIEL, President.  
CHAS. E. FRIEND, Vice-President. G. W. KNOTT, Secretary.

## 700 Urbanna, Virginia, Citizens

With 700 progressive citizens, and situated in the midst of rich farming, trucking and timber lands, holds out many real and unusually good advantages to investors.

Water transportation to all leading points, with low freight rates.

Box, basket and barrel factories would pay handsomely. A splendid place for wagon or veneer factory.

A summer resort—a fishing town. Get full details. Write

Urbanna Business Men's Association

J. W. HURLEY, President.  
R. S. BRISTOW, Vice-President.  
WALTER H. RYLAND, Secretary.

## A Great Opportunity for Immediate Acceptance

Fine Cattle Farm, above quarantine line, near two railroad; 843 acres, \$16,000.00. Terms: Half cash; balance to suit purchaser. All modern improvements.

Nine-room brick dwelling; twelve miles woven-wire fence; well watered.

For further particulars, write

Kennedy Development Company,

Kenbridge, Va.

## MARKETS

(Continued From Third Page.)

foundation whatever, have been circulated so frequently and persistently, to the detriment of market values. A great many traders, it was remarked, accepted them with a credulity that was little short of astonishing.

In the midst of all the turmoil the position of New York Central was materially improved, that stock holding its gain better than any of the others. Purchases were no doubt made for purposes of manipulation, to permit distribution elsewhere and as covering of short contracts, but there was also heavy buying on the theory that the talk of dividends was an ill-founded as that of Rock Island receivership.

The figures of the bank statement showing an increase in deposits and in surplus reserve, accompanied by a decrease in loans, corroborated the opinion that there has been heavy distribution in important quarters.

### TOBACCO REPORT

(Special to The Times-Dispatch.)  
DANVILLE, VA., August 22.—The tobacco market this week has been composed of primings but in larger quantities. None of the better grades have, as yet, commenced to be marketed. Prices on primings are steady, ranging from 2 cents for the commonest to about 10 cents to 11 cents for the best.

The early part of the week the weather was very hot and dry, but followed later by rains and much cooler weather. Reports from the crop are that the weather generally for the past ten days has been favorable. The primings indicate a good crop, with body.

There is slightly more activity in redried tobaccos, but the market is still very dull.

### TOBACCO SALES

(Special to The Times-Dispatch.)  
LYNCHBURG, VA., August 22.—Tobacco sales on the Lynchburg market for the year 1908-1909 opened August 17th. There was a hold during the week ending August 21st, 62,200 pounds, composed entirely of new primings. They were quite well cured and of fairly good leaf and quality, which indicates that the crop of tobacco will be of very good quality and size of leaf, and that a considerable portion will be housed early. The report is that there has been some tobacco cut in every county that sells in this market.

The prices of the primings sold, ranged from \$2.50 to \$5 per 100 pounds, which was satisfactory to the planters generally.

Big Leaf Tobacco Sales.

(Special to The Times-Dispatch.)  
ROCKY MOUNT, N. C., Aug. 22.—The sales of leaf tobacco have increased almost daily this week, and a total of about 20,000 pounds have been sold, which is about double the sales of the corresponding week last year. The offerings still consist almost exclusively of "bottom leaf primings," with but few tobaccos that show character or quality. When the crop is sold, it will sell for good prices, and in fact much better than same time last year. The common tobaccos of the lug variety seem cheap, but considering the worthlessness of them, are high at most any price. As a rule, the sellers are all satisfied.

The crop is practically all housed in this section, and we expect large sales from now on.

GUY W. ESKRIDGE COMPANY  
OPENS RICHMOND OFFICES

The Guy W. Eskridge Company is the firm name of the general advertising agency which has opened offices in the Mutual Building.

Mr. Eskridge has had several years' experience in the advertising business, and is a practical expert in the writing of original copy. A feature of the new agency will be a department for the preparation of illustrative copy.

The new agency will do a general newspaper, magazine, street car and billboard advertising business.

Mr. Eskridge seems impressed with the belief that Richmond offers a particularly favorable field from which to operate, and it is to be hoped that the new agency will meet with a full measure of success.

A force of capable assistants will be employed, and the agency will cater not only to the business firms in Richmond, but of the entire South.

Mr. Eskridge seems impressed with the belief that Richmond offers a particularly favorable field from which to operate, and it is to be hoped that the new agency will meet with a full measure of success.

Make Suffolk a City.

(Special to The Times-Dispatch.)  
SUFFOLK, VA., August 22.—The Town Council will meet early next week to consider the question of making Suffolk a city. Advocates of long municipal skirts say the change would save \$20,000 to \$30,000 a year to taxpayers.

BIG INCREASE IN  
ANNUAL OUTPUT

(Continued From First Page.)

cheaper woods are, where possible, being introduced as substitutes.

Little change is noted in the geographical distribution of the industry of tight stave manufacture from that of former years. Nearly 77 per cent. of the production in 1907 was reported from the five States of Arkansas, Kentucky, Tennessee, West Virginia and Alabama, which, in respect to individual output, ranked in the order named Arkansas alone contributed more than 28 per cent. of the total of all classes of tight staves and nearly 45 per cent. of the production of bucked and split stock. Kentucky, while producing only 16 per cent. of the total of all staves reported 21.7 per cent. of the bucked and split stock and 53.9 per cent. of the beer and ale stock production. Tennessee ranked next to Arkansas in the output of the total of this class, and contributed 21.6 per cent. of the total of the beer and ale staves reported. The bulk of the Bourbon stave production for 1907 was reported, as previously, from Kentucky and Tennessee, with

21.5 and 26.1 per cent. of the total, respectively.

Almost the entire product in West Virginia consisted of sawed staves, by far the major part of which were classed as oil. Alabama supplied 7.3 per cent. of the total tight stave production, 14.3 per cent. of those classed as bucked and split, and 27.6 per cent. of the hewed stock reported. In certain other States where the aggregate production of tight staves was comparatively small, one or more of the four classes of stock was manufactured in relatively large quantities. Louisiana contributed more than 29 per cent. and Texas 18.4 per cent. of the total production of hewed stock, and owing to the fact that the average value per 1,000 of this grade of staves is much higher than any other, the relative prominence of these States in the industry is greater than their totals of production would indicate.

As in 1906 the leading States in the manufacture of tight staves were Arkansas and Tennessee, in the order named, the combined production of these two States forming approximately two-thirds of the total output in both Bourbon and beer and ale heading as well. Not only is the best grade of Bourbon and beer and ale heading as well produced in largest quantity in Kentucky, but the production of tight heading of all kinds in this State in 1907 was substantially larger than in the preceding year, the increase being 2,525,817 sets to 3,217,167 sets. Other States producing relatively large quantities of tight heading in 1907 were West Virginia, Mississippi and Texas.
